Price:\$29.95 Buy Now Developer: NextUp Technologies

TextAloud converts any text into spoken words. Instead of the valuable time you spend reading on your computer, imagine being free to relax, get up and stretch, or work on other things while the information you need is read to you in a pleasant, natural sounding human voice. Better still, leave your computer behind.

TextAloud's unique Text to MP3 conversion can save your daily reading to MP3 audio files to download to your portable MP3 player. Listen to email, online news, or important documents while you exercise, work or commute. Download TextAloud now and start getting more out of your time.

What you can do with TextAloud:

- Sit back and relax while your PC reads to you
- Save text to MP3 for portable audio players
- Proofread your own writing
- Listen to that report while you're on the treadmill
- Find help for someone with a reading disability
- Create messages for your answering machine
- Reduce eye strain from too much reading
- Listen to information while you work on something else
- Take some reading along for your daily walk or run
- Turn your iPod into a tax write-off
- Listen to an eBook during your commute
- Study English as a Second Language
- Help a senior citizen or someone with low vision
- Add some spice to your PowerPoint presentations
- Find a great new tool to study for exams
- Listen to text read in other languages
- Amuse your kids by letting your PC read stories to them
- Create audio files for computer games
- Prepare for a big speech by hearing your words read aloud
