AIM Spy Monitor spy software can secretly record all AIM's incoming and outgoing chat text messages. It runs in a complete invisible mode. You can check all recorded messages by simply receiving emails or opening a web page.

Perfect for catching cheaters, monitoring employees, children or spouse, and even investigating crimes.

The re-check mechanism can ensure you get the whole super-large messages, and prevent you from getting the same message repeatedly. You can show all messages in AIM Spy Monitor directly, export these messages to HTML files in a directory for later analysis, or send a report to your custom email address or FTP server. Everything will be recorded without being detected. It is especially useful for administrators or parents, who need to know what their employees or kids are care and talking about with others. Use your hotkey to unhide it from complete Stealth Mode and protect the program access by password. Uninstall it easily from the program interface. If you have questions about setup email report function, please read report delivery instructions. You can download AIM Spy Monitor and take a trial before order to make sure it works for you.

### Features include:

- AIM Chatting Conversations - monitor and record latest version AIM chatting conversations with time stamp, user names and all incoming / outgoing messages. It also logs the username and password used to login in a messenger.
- Stealth mode: AIM Spy Monitor run absolutely invisibly under Windows systems and does not show in Windows task list. You can also choose to hide or unhide AIM Spy Monitor icon and its uninstall entry.
- Logs view: choose to view different type of logs from program main interface. You can delete selected logs or clear all logs, search logs or export logging reports in HTML format.
- Task Schedule: You can set starting and ending time for each task to automatically start and stop the monitoring job.
- Report Delivery: Send logging reports in HTML format to an mailbox at set time intervals.
- Easy-to-use Interface: configure AIM Spy Monitor with either Wizard for common users or control panel for advanced users. User-friendly graphical program interface makes it easy for beginners.
