DirectX 9.0 or higher Category: Internet:Online Privacy Screenshot: View the screenshot of this software Download: 0.65Mb Download for Free!Price:\$4.99(1GB) Buy Now Developer: AVSoftware

Surf securely through WiFi Hotspots or regular connections and protect your privacy by encrypting your Internet traffic. Your personal information, bank accounts, credit card numbers, passwords are now protected. WiFi Guardian will also change your IP address and will conceal your web activities. Even your Internet Service Provider (ISP) will not be able to track which websites you are visiting or what you are downloading. The software will allow you to access websites you were banned on. By using our software you are granted fast 100Mbps secure connection to Internet anywhere in the world.

WiFi Guardian is a Public WiFi security software that will protect your Connection to Internet. The Internet security in public cafes, restaurants, airports or others is not trustworthy. One can easily track all your web activities while surfing unless you encrypt your connection.

## Key features of WiFi Guardian:

- Surf securely through WiFi Hotspots or regular connections

Protect your privacy by encrypting your Internet traffic. Your personal information, bank accounts, credit card numbers, passwords are now protected.

- High Encryption

Protected by 128 Bit SSL encryption, WiFi Guardian will fully secure your Internet connection.

- Make you anonymous

By using our servers, your traffic is fully routed through them. As a result, your IP address is changed and your real IP is hidden. We have several web servers around the world that you can use in order to become anonymous. Your Internet Service Provider or WiFi Hotspot holder will never know which site you are visiting or what you are downloading because all your traffic is encrypted.

- View blocked pages

Do you want to watch your favorite shows when you are not in the USA or UK? WiFi Guardian will change your IP to look like as if you are currently residing in US or UK (more servers coming soon). In addition, you can visit forums/websites that blocked your IP address.

- Fast servers with 100% availability

We constantly monitor our servers for changes in load. In cases of high usage we immediately add additional servers. Our servers offer High Speed 100Mbps connection which grants you fast access to the Internet. Our servers are available from any place on earth unless restricted by the local ISP provider.

- Anonymously share and download files

Due to the high encryption, WiFi Guardian grants you complete anonymity even from your ISP while sharing or downloading files in p2p networks or torrent networks.
