With Blog Finder you can build unlimited, high quality, targeted backlinks to all your websites. Blog Finder is 100% no-spam search engine friendly blog commenting software that provides you with a great way to get backlinks for your sites without using any risky tactics that could destroy your search engine rankings. With Blog Finder your time for finding themed blogs and submitting comments to them is reduced to minimum. In a record time you can gain dozens (if not hundreds) of high quality backlinks, get your websites indexed naturally by search engines and attract more human traffic to your sites.

Blog Finder is designed to search for blog posts that rank in Google for a particular phrase and makes it easy to comment on them. Blog Finder searches for quality blogs that accept comments. It brings up blogs with both "dofollow" and "nofollow" tags. It also shows the Google PageRank for each domain and blog page post and has options that can be tweaked to filter by Domain PR, Page PR, link type, date and user note.

You can export a report about your blog comments to a user definable format at any time. With a powerful Backup/Restore feature you will never lose your keywords and blog lists found for these keywords. You can save a full backup of your workplace and restore it whenever you need it.

With Blog Finder you can:

- search the Internet for blogs that accept comments using the keywords or keyword phrases
- determine the domain and blog page PR
- determine the type of blog page ("dofollow" or "nofollow")
- post comments on the blogs directly from the program
- reduce to minimum your time for finding themed blogs and submitting comments to them
- dramatically increase search engines and human traffic to your web sites
- boost your natural search engine rankings
- gain dozens (if not hundreds) of high quality backlinks to your websites
- instantly get the search engine spiders to your web sites and get your sites indexed naturally
